

Blacklisted Suggestions

The suggestion system is a great way to have a video created on your idea, and we want to ensure that your suggestion has a high chance of being seen and voted on by others. In order to accomplish this, we've assembled a list of suggestions that cannot be suggested. Suggestions may be blacklisted for multiple reasons, but the most common reason behind why an idea is on the list is because it has already been suggested and voted on many times in the past. We are so grateful that you have chosen to submit a suggestion, so please review the list below so that everyone has a fair chance at getting a video created on their idea.

- Ranking Sticks – Previously suggested
- Ordering System – Previously suggested
- Discord MR/HR/Staff Support Call – Previously suggested
- Face Reveal – Previously suggested
- Any video that has already been created by RoScripter

We will keep this list up to date as more ideas are submitted and more videos are released. We ask that you please don't suggest any of the video ideas found on this list. Thanks so much for your suggestion! We can't wait to see your idea.
